**DIV. OF OIL, GAS & MINING**

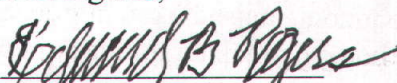

Dear Ms. Wright:

We have reviewed the Findings of Fact, Conclusions of Law and Order (the Order) of the Board of Oil, Gas and Mining, Cause No. 2007-011, along with your Order to Lon Thomas' Star Stone Quarries (SSQ) regarding the dumping of material on Wright/Garff Resources, LLC (Wright/Garff) mining area. According to our calculations, SSQ's time for appeal has expired and the Board's Order is final.

W/G is presently negotiating a lease with a miner who will then be submitting a Notice of Intent regarding a Large Mining Operation on that portion of Lot 38 excluding the 3.5 acres of minerals controlled by the Bureau of Land Management. In the interim if SSQ or any other of Lon Thomas' entities brings onto the W/G controlled mining area any stone or other material for splitting, selling or creating waste, W/G will notify your Division to request appropriate actions to halt such unlawful operations and enforce the sanctions outlined in Cause No. 2007-011.

Inasmuch as W/G or its leasee, in accordance with Division requirements, will be taking full responsibility for reclamation on the approximately 36.5 acres of Lot 38, direction is requested from the Division regarding the type and amount of bond required. If any other action by W/G is needed prior to submission and approval of the NOI, please advise. Having already lost two years revenue from Lot 38 mining, W/G is determined to see that the approval process is completed as expeditiously as possible. 

Kindest regards,

  
Edward B. Rogers, Manager
